/* Conditional statement Section  
/* =====
```

```
/* Types of Conditional statement in JS  
// If Else Statement  
// Else If Ladder  
// Switch Statements
```

```
/* =====  
/* 1. If Else Statement  
/* =====
```

//? If Else: The if...else statement executes a statement if a specified condition is true and if the condition is false, it executes another statement.

```
//? Syntax  
// if (condition) {  
//   // Code to be executed if the condition is true  
// } else {  
//   // Code to be executed if the condition is false  
// }
```

```
//? Let check the temperature  
// var temperature = 25;  
// if (temperature > 30) {  
//   console.log("lets go to beach");  
// } else {  
//   console.log("tv dekhte hai");  
// }
```

```
/* =====  
/* 2. Else IF Ladder  
/* =====
```

```
// var marks = 80;  
// if (marks >= 60) {  
//   console.log("First Class");  
// } else if (marks >= 50) {  
//   console.log("Second Class");  
// } else {  
//   console.log("Fail");  
// }
```

```
/* =====  
/* 3. Switch Statment  
/* =====
```

// Switch Statement: The switch statement is used to perform different actions based on different conditions.

```
//? Syntax:  
// switch (expression) {  
//   case value1:  
//     // Code to be executed if expression === value1  
//     break;  
  
//   case value2:  
//     // Code to be executed if expression === value2  
//     break;
```

```
// // More cases can be added as needed
```

```
// default:
// // Code to be executed if none of the cases match
// }

// var day = "Friday";

// switch (day) {
//   case "Monday":
//     console.log("today is monday");
//     break;

//   case "Friday":
//     console.log("today is friday");
//     break;

//   case "Sunday":
//     console.log("today is sunday");
//     break;

//   default:
//     console.log("no condition match");
// }
```
